

# Softonus Instant Hot System

An innovative system for health and comfort

**Instant comfortable heat when needed.**  
**Careful and effective recharging in the CARUM reactivator.**

Softonus Instant Hot System is based on proven, patented technology. Softonus Shoulder-Pads are high-quality products spending comfortable warm wellness for up to one hour.

## Advantages of the CARUM Reactivator

- Easy to operate (Digital timer)
- Patented recharging process
- Customized for Softonus Activator -Packs

Softonus Instant Hot System is a system for heat treatment using activator hot packs that are especially suited for prevention and pain relief.

Softonus activator packs can be used

- for releasing muscle tensions.
- for pain relief\*
- for warming up before training
- for prevention and comfort
- for softening of stiff joints
- for chronic, not infected injuries\*
- for re-warming after under-cooling\*

The hot packs can also be used as a prevention in work places where people are vulnerable to injuries as a result of monotonous muscle strains. This can be factory workers but also office workers and hair dressers.

The Softonus Instant Hot System is a patented system containing activator hot packs and a reactivator. The reactivator is used to recharge hot packs carefully and effectively in order to assure that the hot packs are re-useable many times.

\* In such cases hot packs shall only be used after consultation with a doctor. Heat treatment must not be used at acute injuries and infections.
